Do you need a power tool battery safety certification?

Meeting rigorous regulations for power tool battery safety and performance requires the right knowledge and expertise to navigate critical certification challenges. You can rely on our safety science and regulatory expertise to help bring safer battery-powered products to market.

Are lithium-ion batteries the future of cordless power tool batteries?

Lithium-ion battery technology now dominates the cordless power tool battery market. As consumer demand increases, there is a growing need for lightweight, compact and longer-running batteries with larger energy density, lower discharge rates and faster charging that can maintain energy density over repeated recharging.

What are battery test standards?

Battery test standards cover several categories like characterisation tests and safety tests. Within these sections a multitude of topics are found that are covered by many standards but not with the same test approach and conditions. Compare battery tests easily thanks to our comparative tables. Go to the tables about test conditions

The technical foundation for universal power tool battery systems exists today. The primary obstacles remain commercial rather than engineering-based, centered on protecting ...

To meet these requirements, manufacturers use a variety of specialized machinery and equipment. Battery production requires high-precision machinery to ensure the quality and safety of finished ...

For power tool makers, this isn't a minor update; it's a complete overhaul of compliance obligations. The law covers the entire battery lifecycle, from sourcing raw materials to end-of-life ...

Search elements like "performance test" and "design" have been added to find quickly the set of applicable standards. Standards lookup. Battery test standards cover several categories like ...

Power tool battery standardization is revolutionizing the industry in 2025. It creates unprecedented compatibility across manufacturers and reshapes the cordless battery ecosystem.

## Tool battery finished product delivery standards

Although merely an April Fool's joke, tool enthusiasts buzzed about a single, standardized battery system.

We expect to see new tool technologies that are able to leverage the higher power delivery capabilities of tabless battery cells. If multiple brands' power and performance claims prove to be ...

The International Energy Agency (IEA) predicts that global power tool battery standardization by 2030 will reduce electronic waste by 800,000 tons annually, cut user procurement ...

Meeting rigorous regulations for power tool battery safety and performance requires the right knowledge and expertise to navigate critical certification challenges.

We can test and evaluate your lithium-ion batteries and battery packs for tools, lawn and garden machinery to the relevant standards and regulations in your target markets.
