-----

Chinese solar manufacturing giant Trina Solar has developed the world's first industrial-standard solar PV module delivering over 800 watts (W) of maximum power.

Trinasolar announced it has developed an "industrial-standard" solar panel that reaches 800 W. The 3.1 m<sup>2</sup> module using 210x105-mm perovskite/silicon tandem solar cells reached 808 W ...

Trina Solar 's National Key Laboratory of PV Science and Technology said its newly developed perovskite-polysilicon tandem module achieved a peak power output of 808 W in testing ...

With a peak power output of 808W, this module has been referred to as "the world's first industry-standard photovoltaic module to surpass the 800W power milestone". Since 2014, Trina ...

Trinasolar, a global leader in smart PV and energy storage solutions, has announced that it has developed the world's first industrial-standard solar PV module delivering over 800W of ...

Trina Solar has just reached a milestone in the photovoltaic industry. Its latest tandem module, which combines layers of perovskite and silicon, achieved a power output of 808 watts in ...

In an exciting breakthrough for the solar industry, Trinasolar has announced the development of the world's first solar PV module capable of delivering over 800W of power.

This achievement was verified by the globally renowned certifying body, TÜV SÜD. As a result, it has become the world's very first industrial - standard - sized photovoltaic module to shatter ...

Trinasolar has introduced the world's first industrial-grade solar photovoltaic (PV) module with a peak power output surpassing 800W. This new 3.1m<sup>2</sup> module, made with 210mmx105mm ...
