What is the energy consumption of Turkey in 2025?

According to the results of the Türkiye National Energy Plan, electricity consumption is expected to be 455.3 TWh in 2030, 510.5 TWh in 2035. The shares of resources in electricity generation in 2025 were as follows: Coal: 33.6%, Natural gas: 23%, Hydropower: 15.8%, Wind: 10.9%, Solar: 10.5% from Geothermal: 3.2%, Other Sources: 3.1%.

How does electricity cost in Turkey?

Electricity prices are state-controlled, but wholesale prices are heavily influenced by the cost of imported gas. Each year, about 300 terawatt-hours (TWh) of electricity is used, which is almost a quarter of the total energy used in Turkey.

How much electricity does Turkey use a year?

Each year, about 300 terawatt-hours (TWh) of electricity is used, which is almost a quarter of the total energy used in Turkey. On average, about four hundred grams of carbon dioxide is emitted per kilowatt-hour of electricity generated (400 gCO₂ /kWh); this carbon intensity is slightly less than the global average.

What are the aggregation activities in Turkish Electricity Market?

1. Aggregation Activities in Turkish Electricity Market (agreement to sup.) Unlicensed Generation (Up to ... MW) Total installed capacity (Max. Limit) Determination of the upper limit It can participate in the tenders to be conducted by system operator. 2. Acceleration of Permit and Approval Processes in Licensed Generation

The annual gross electricity consumption in 2025 increased by 2.1% to 360.9 TWh, compared to the previous year. Electricity generation reached 362.9 TWh, increasing by 2.4%.

Turkey's energy market is increasingly focusing on renewable sources, driven by government policies aimed at reducing reliance on imported fossil fuels. The energy market is a broad term...

OverviewMarketConsumptionGenerationTransmission and storageDistributionResilienceRetailingEnergy Exchange Istanbul (EXIST), is the electricity market operator company responsible for the day-ahead and intra-day markets. EXIST was established in 2015 and operates under a license from the Energy Markets Regulatory Authority (EMRA). As of 2022 the wholesale price is the same across the country, but it has been suggested that price zones should be defined to reflect network congestion, for example in getting run-of-the

river hydropower to consumers. The wholesale price is generally lowest i...

The development of the Turkish electricity market can be split into three stages. Market is in the late Growth Stage, setting the screen for Green Transition Chapter, during which main focus ...

Monitor Electricity prices in Turkey with monthly reports featuring current prices, trends, forecasts, and market assessments. Free preview available.

Major Developments in Türkiye Aggregation Acitivities in Turkish Electricity Market Acceleration of Permit and Approval Processes in Licensed Generation Licensing of Unlicensed Power Plants 1. ...

This report discusses the power market structure of Turkey and provides historical and forecast numbers for capacity, generation, and consumption up to 2035. Detailed analysis of the ...

Primary energy consumption grew slowly (+1.7%/year since 2017), with oil stable at 29%, gas and coal declining, and primary electricity rising. Installed power capacity reached 112 GW, driven by solar ...

Ember"s Türkiye Electricity Review, published for the fourth consecutive year, analyses Türkiye"s electricity generation and consumption data in 2024. The report also compares Türkiye with ...

Turkey uses more electricity per person than the global average, but less than the European average, with demand peaking in summer due to air conditioning. Most electricity is generated from coal, gas ...

Our independent market research aims to provide a historical review of the development of Turkey"s electricity market with a special focus on organization of the market, key player and latest ...
