How much does a solar battery cost in the UK?

But with battery prices varying from $\pounds 4,000$ for an entry-level 4kWh right up to a whopping $\pounds 12,000$ for a 16kWh model, choosing the right system for your home is vital. Here, we break down the latest solar battery system costs in the UK and help you choose the correct size solar battery for your home's energy usage.

How much does a 10kW solar battery cost in the UK?

The average price of a 10kW solar battery in the UK is approximately $\pounds 8,000$. Are solar batteries worth the cost in 2026? For larger properties, battery storage generally makes sound economic sense. However, for smaller homes, there are several factors to consider when determining whether it is economically viable.

How can I reduce my solar panel battery cost in the UK?

There are currently solar panel funding opportunities which can significantly decrease the solar panel battery cost in the UK. Through the Smart Export Guarantee (SEG) you can earn money for exporting your excess solar energy back to the grid. Export tariffs vary with each energy supplier, but a good tariff is between 4-20p/kWh.

How much energy can a home use without battery storage?

Without battery storage, most households can only use about 30% directly, with the remaining 70% exported to the grid at modest rates averaging 5.5p per kWh through the Smart Export Guarantee (SEG). Annual savings from solar alone: approximately $\pounds 370$

UK residential energy storage battery prices vary significantly depending on capacity, brand, and features: Residential energy storage (5-20 kWh): approximately $\pounds 3,000$ - $\pounds 12,000$
