In the rapidly growing but still relatively new battery energy storage sector, equipment procurement and integration for large projects presents numerous risks. Jared Spence of IHI ...

US utilities are poised for a massive energy storage expansion, with over 18.5 GW planned. Learn about state targets, innovative technologies, and the future of grid modernization.

The US state of Massachusetts has selected four battery projects totaling 1.3 GW under its first major procurement round to meet a statutory target of 5 GW of energy storage by 2030.

This chapter supports procurement of energy storage systems (ESS) and services, primarily through the development of procurement documents such as Requests for Proposal (RFPs), Power Purchase ...

While the energy storage market continues to rapidly expand, fueled by record-low battery costs and robust policy support, challenges still loom on the horizon--tariffs, shifting tax incentives, ...

If all of the energy storage-related requests for proposal (RfPs), site applications, and other utility proposals that were active at the end of 2024 take shape, US utilities will add more than ...

Accelerated by DOE initiatives, multiple tax credits under the Bipartisan Infrastructure Law and Inflation Reduction Act, and decarbonization goals across the public and private sectors, energy storage will ...

The agreement announced February 3 includes 5 GWh of lithium-ion energy storage projects for utility-scale installations, as well as lifecycle services from LG Energy Solution Vertech.

The U.S. energy storage industry is committed to investing more than \$100 billion in American grid battery manufacturing and supply chains, including expansion capital for expanding U.S. battery ...
