Modern energy storage systems will enable greater utilization of solar energy and stabilize electricity prices. The KNESS Group is currently implementing seven energy storage system projects ...

The UK and Ukraine have launched the InnovateUkraine programme, which will support 13 green energy innovation projects in Ukraine with a & #163;16m investment from the UK government.

Following three years of bombardments and damage to its energy infrastructure, Ukrainian businesses are turning to self-consumption solar PV systems to keep the lights on.

Interest in installing solar PV on rooftops has remained strong while attacks on energy infrastructure and the frequency of outages have increased. Ukraine's international partners and the government have ...

Despite wartime risks and constant pressure on the energy system, Ukraine continues to develop a new decentralized, resilient, and modern energy infrastructure. One such project is the construction of a ...

Against the backdrop of energy transition and geopolitical challenges, Ukraine has reached a new energy milestone. DTEK, Ukraine's largest private energy company, in collaboration ...

DTEK Group, together with the U.S. company Fluence, a global leader in energy storage, commissioned 200 MW of capacity with a total storage volume of 400 MWh. The new facilities, ...

A report by the International Energy Agency (IEA) recommends three strategies to accelerate the deployment of distributed solar and battery energy storage systems (BESS) in ...

The completed project in Chortkiv is the first solar energy project implemented by Nefco to support critical infrastructure in Ukraine. The solar power plants were officially commissioned on ...

The National Energy and Utilities Regulatory Commission of Ukraine (NEURC) has approved the connection

Ukraine solar energy storage joint project

of a 3.8 MW solar plant, integrated with a 6.9 MWh energy storage system, ...
