The solar glass made by our company has passed U1 Certificate by SPF Swiss International Testing Center and has become the first selected product of solar battery and solar water heater assembly.

Energy saving and environmental protection: ultra white tempered solar glass can convert the absorbed light energy into electrical energy or heat energy, and can be used in solar power generation, solar ...

The Ultra White Solar Glass is an essential part of our Solar Glass offerings. High-quality solar glass is characterized by superior light transmission, durability, weather resistance, and low reflection. It ...

New Way photovoltaic solar panel glass features High light-transmittance, Strong Hardness, Aesthetic Improvement, Light-weight, and Customizable. Contact the leading solar glass manufacturer with ...

Ultra-white calendered photovoltaic glass for solar photovoltaic modules is a low-iron glass with ultra-white cloth pattern (suede) embossing on the glass surface. After tempered coating, the light ...

Ultra white tempered solar glass is an advanced variant engineered specifically for photovoltaic (PV) and solar thermal applications. Its low iron content (typically less than 0.015%) increases light ...

With its very high solar energy transmittance, our low iron glass Pilkington Optiwhite(TM) is the ideal cover plate for a range of solar technologies, including Thin Film Photovoltaics, Concentrated Solar Power ...

The ultra-white rolled photovoltaic glass for solar photovoltaic modules is a kind of low-iron glass with ultra-white cloth pattern (textile) embossed on the glass surface. The light transmittance after ...

Energy saving and environmental protection: ultra white tempered solar glass ...

This top-quality float glass boasts a smooth, flawless surface, excellent optical clarity and impressive resistance to chemical attack and mechanical stress. Due to its excellent stability and elasticity, our ...

Ultra-white tempered glass for solars

The Low iron is mainly used for Solar Tempered glass panel, The Light Transmittance more than 91.5 %, if they were AR coated process, The Light Transmittance more than 95 % .
