Will port of Victoria build the world's first nuclear power plant?

"We're proud to be working with Port of Victoria leaders to establish our footprint in Texas and look forward to engaging with local and regional partners, including the City of Victoria and nearby Bloomington, as we take steps to build the world's first project-financed nuclear power plant."

What is Victoria's energy plan?

"The plan attempts to minimise the area of Victoria required for renewable energy zones and the new transmission infrastructure needed, while also providing project developers and investors with sufficient opportunity to generate the energy we need to power homes, farms, schools, businesses, hospitals and other essential services."

How much does electricity cost in Victoria?

"Victoria consistently has the lowest wholesale power prices in the country, helping to slash energy bills for families and businesses." Victorians paid an average wholesale price of \$107 per megawatt hour, compared to \$151 for NSW, \$138 for South Australia, \$127 for Queensland and \$115 for Tasmania, according to government data.

What percentage of Victoria's Electricity is produced by renewables?

D'Ambrosio says more than 42 per cent of Victoria's electricity was produced by renewables in the past financial year, with the state reaching record levels of renewable energy generation. The VTP says that these figures factor in new capacity from already committed projects across the state.

Blue Energy will conduct feasibility studies for the potential development of a nuclear power facility at the Port of Victoria. The facility would be capable of generating up to 1.5 gigawatts...

The Victoria County Navigation District (Port of Victoria) is proud to announce it has signed an option agreement with Blue Energy, an advanced nuclear power company, to lease ...

Under the agreement, Blue Energy secured a site to design, develop, and operate an advanced nuclear power plant of up to 1.5 gigawatts (GW), delivering affordable, reliable power to ...

As artificial intelligence and advanced manufacturing drive unprecedented global energy demand, Blue

Victoria new energy site

Energy is meeting the moment with a bold new approach: building the world's first ...

In a transformative step towards a sustainable energy future, the Victoria County Navigation District (Port of Victoria) proudly announces a long-term lease agreement with Green ...

VicGrid is now responsible for planning Victoria's electricity transmission network and is working with communities to deliver the right renewable energy infrastructure in the right place at the right time. ...

AI data center developer Crusoe has partnered with US nuclear energy firm Blue Energy to develop an up to 1.5GW nuclear-powered data center campus located in the Port of Victoria, ...

One of Australia's largest renewable energy transmission projects has expanded the planned development zones for solar, battery and wind developments with the cost of connection to ...

The 1,600-acre Crusoe campus, in Victoria County, was chosen for its location, existing infrastructure, and available energy resources to support a gigawatt-scale AI factory campus.

VicGrid is developing the new shared transmission line to connect offshore wind energy generated off the Gippsland coast to Victoria's electricity grid. Building a more resilient renewable energy industry ...
