Victoria is the home of big batteries and has legislated storage targets of at least 2.6 GW by 2030 and 6.3 GW by 2035 to provide crucial support for more renewable capacity.

Victorian homeowners are rapidly embracing solar battery storage as energy costs rise and grid reliability fluctuates. By pairing rooftop solar panels with a smart battery system, households ...

Our 20 and 40 foot shipping containers are outfitted with roof mounted solar power on the outside, and on the inside, a rugged inverter with power ready battery bank.

Checking the system often and using smart monitoring protects solar battery life and keeps solar storage working in every container. To pick the best container size, first learn how much ...

Solar Victoria's safety inspection program will include battery installations. Solar Victoria also ensures that authorised installers have completed all the required trainings to conduct installations safely.

Interested in installing a solar battery? Find out everything you need to know about solar batteries including how to research battery retailers and estimate savings from a new system.

It's a modified shipping container built to house solar panels, batteries, inverters, and other off-grid power systems. These units are ideal for powering remote sites, construction camps, emergency ...

The energy stored in a solar battery system is used in the home whenever there is energy usage above the level produced by the solar panels (typically in the evening peak). This battery-stored energy can ...

We have deployed Solar Power Container units at three of our mines and the results have been outstanding. The ease of transportation and short installation time saved us weeks of downtime.
