What is the Wellington Battery energy storage system?

The Wellington Battery Energy Storage System (BESS) will store excess renewable energy ready for use by homes and businesses during peak times. BESS projects play an important role in the future electricity system. Construction of the project will be undertaken by AMPYR's preferred construction contractors Fluence and RJE Global.

Who is delivering the Wellington Stage 1 Bess project?

The project will be delivered by United States-based Fluence Energy, using its Gridstack energy storage product. Fluence has also entered into a 20-year operational service contract to service and maintain the Wellington Stage 1 BESS, with revenues to be optimised by the company's Mosaic and Nispera software platforms.

What is the Wellington Stage 1 grid-scale battery?

"The Wellington Stage 1 grid-scale battery represents a significant contribution to growing Australia's renewable energy capacity and strengthening its grid stability. Our partnership with Fluence will enable the delivery of competitively priced, reliable renewable energy to major Australian electricity users.

Who financed the Wellington Stage 1 Bess?

Financing for the Wellington Stage 1 BESS was led by a lender group including the Commonwealth Bank, HSBC, Rabobank, Bank of China, Societe Generale and United Overseas Bank. This content is protected by copyright and may not be reused.

The Wellington Energy Storage Photovoltaic Project, launched in Q1 2025, tackles this through a 600MW solar array paired with a 480MWh liquid metal battery system.

In conclusion, as Fluence embarks on this landmark project with AMPYR Australia, it not only sets a precedent for future battery storage initiatives but also demonstrates the potential for ...

The Wellington Stage 1 BESS is AMPYR's first grid-scale battery energy storage system to reach financial close in Australia. This project is scheduled to be energized in 2026, signaling a ...

# Wellington air energy storage project launched

Ampyr Australia has chosen energy storage technology firm Fluence to deliver its Wellington Stage 1 battery energy storage system (BESS) in New South Wales, the companies said ...

Ampyr Australia, the local arm of Singapore-based developer Ampyr Energy, has achieved financial close for its 300 MW / 600 MWh Wellington stage one battery energy storage system project ...

Fluence Energy was selected by AMPYR Australia for construction of the 300 MW, 600 MWh Wellington Stage 1 Battery Energy Storage System as well as a 20-year service and ...

Wellington A-CAES will allow New South Wales' attractive and growing solar and wind resources to be directly converted into reliable, on-demand electricity for the greater region and the broader NSW ...

Construction of the project will be undertaken by AMPYR's preferred construction contractors Fluence and RJE Global. The project will be delivered in two stages. Construction of Stage 1 (300MW / 2 ...

The Wellington Stage 1 BESS is AMPYR's first grid-scale battery energy storage system to reach financial close in Australia. This project is scheduled to be energised in 2026, signaling a ...
