Should you buy a solar PV system in Barbados?

One of the biggest, if not the biggest hurdle to further solar PV penetration in Barbados is the upfront cost of a system. When you think about the fact that the cost is essentially the prepayment of 25-30 years worth of electricity it makes sense that the price is "high". If you could purchase a ... Continue reading ->

Does Barbados use solar panels?

Solar panels are seen more and more frequently across Barbados. Similar to the ubiquitous solar water heater on Barbadian rooftops, the Government of Barbados is fully committed to the idea of renewable energy and solar PV, thereby preparing the country for even more substantial growth in this sector.

What is the cost of electricity in Barbados?

The cost of electricity in Barbados is around \$0.65 per kWh.

What is the installed solar PV capacity in Barbados?

The total installed solar PV capacity in Barbados is about 22MW(12MW RER +10MW utility).

A cost recovery application for 90MW of battery storage, filed by Barbados Light & Power Company (BLPC), has been only partially approved by the eastern Caribbean island nation's regulator.

To promote and facilitate energy security reliability and affordability, and establish and maintain a sustainable energy sector for Barbados.

A \$350 million hybrid renewable energy power plant is scheduled to be constructed in Barbados. It will be the largest, most advanced facility in the area, as BioEnergy Times reported.

Barbados' electricity rates are approximately \$0.28 per kilowatt-hour (kWh), below the Caribbean regional average of \$0.33/kWh.

BLPC is seeking proposals from qualified investors to install up to 200 MW of battery storage systems. These
