Through spatial mapping and access to technical support the London Solar Opportunity Map accurately highlights opportunity areas for installing solar and storage in homes and businesses.

We're inviting bidders to help us deliver purpose-built solar photovoltaic (PV) farms for the Tube network, in a move to make the energy we use and rely on cleaner, greener and potentially ...

This marks a significant step towards TfL's goal of running the capital's transport network on 100% renewable energy by 2030. A new solar facility will be built in Longfield, Essex, by EDF ...

TRANSPORT for London (TfL) plans to build giant solar farms to power the capital's underground trains, with leafy commuter towns at the end of lines likely to host the new ...

On a vast expanse of land behind a commuter town just east of London, 108,000 newly installed solar panels glint in the sun, soaking up energy that will soon be transported through cables ...

If you look online for a list of the biggest solar sites in the UK, you will find a lot of basic and out of date information. This list is changing frequently as big new solar sites are deployed in the ...

This updated 2025 guide combines an interactive map, regional insights, and policy context to help you understand the state--and the future--of solar power in the UK.

Iconic London landmarks including Tower Bridge, Hampstead Heath, and the Barbican Centre will be powered by renewable electricity from a new solar farm in Dorset. The City of London Corporation,...

It's no surprise that the areas with the lowest number of residential solar panels are all in a large urban area like London. These areas have a high percentage of people living in flats compared ...

Where are the new energy photovoltaic sites in London

Repowering London has been working for a decade to build sustainable, community-led energy systems in London. So far, we have supported the establishment and growth of 11 energy co-operatives and ...
