---

Use WeatherPower graphics to show daily wind and solar electricity generation based on weather of the day and installed capacity in your area.

The repository contains wind speeds and generation based on three different meteorological models: ERA5, MERRA2, and HRRR. Data are publicly accessible in simple csv files.

At the link below you can find a detailed description of the structure of our data pipeline, including links to all the code used to prepare data across Our World in Data.

The repository (called PLUSWIND) is publicly available and contains hourly wind speed and generation estimates covering 2018 - 2021 for existing wind plants located within the contiguous ...

Scituate, Massachusetts: hourly, daily, weekly, monthly, yearly production and consumption of a 1.5-MW turbine since March 30, 2012 (100% daily generation would be 36,000 kWh)

Looking for archive data?

The Global Wind Power Tracker (GWPT) is a worldwide dataset of utility-scale, on and offshore wind facilities. It includes wind farm phases with capacities of 10 megawatts (MW) or more.

Access real-time data and insights on the U.S. electricity grid's operations, including generation, demand, and system conditions.

Using three different sources of data and turbine power calculated for more than 126,000 sites in the United States, the toolkit provides powerful information for the next generation of wind energy ...

The Global Wind Atlas is a free, web-based application developed to help policymakers, planners, and

## Where to find the daily wind power generation

investors identify high-wind areas for wind power generation virtually anywhere in the world, and then ...
