Blickle drive wheels provide excellent performance and stability for drive and conveyor technology. Perfect for industrial use.

This shall enable a radical step forward for LCoE reduction, whilst also addressing scalability, harbour infrastructure suitability and availability, and the sustainability & circularity of floating offshore wind.

Our shipping container wind turbines are designed to withstand the demands of outdoor environments and deliver long-lasting performance. We use high-quality wind turbine systems that are built to ...

As turbines grow larger and more powerful, the infrastructure needed to support them must evolve. Containers designed specifically for off-shore wind applications are becoming essential.

Current estimates indicate that it costs \$100,000 to \$150,000 to transport blades from either a port of entry or manufacturer to a wind farm. As component parts of wind generators increase in size, these ...

Solutions for a safe connection of the earthing system with the equipotential bonding inside the plant. This can be achieved in concrete towers with pre-installed grounding anchor points. In contrast, steel ...

Econowind supports a wide range of shipping segments, with wind-assisted ship propulsion solutions tailored to your vessel. Whether you choose to purchase or opt for a short-term lease, our ...

The container turbine mount allows a small wind turbines, satellite dishes, solar panels, antennas, and more to be installed on ISO standard shipping containers. The mount securely bolts to the standard ...

Sidewind is a breakthrough innovation in the use of wind power in transport ships. Designed to utilize the wind energy that is wasted around cargo ships by converting that energy (kinetic) into electricity, ...

Create modern, eco-friendly spaces with Corner Cast's shipping container solutions. Our bespoke designs

Wind power container ground wheel

offer innovative, affordable, and sustainable wind and solar energy spaces tailored to your ...
